Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 is rendered indefinite because of the terms "aldehyde C-11", "undecylenic", and "aldehyde C-12 lauric". It is assumed that Applicant intends the 11 and 12 carbon member aldehydes. The nomenclature used in the instant claim is unclear and clarification is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4-9, 11-16 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,177,057 to Zampino et al. (herein referred to as "Zampino et al. '057").

Zampino et al. '057 teach a composition that comprises acid compounds (benzoic), nitrogen containing compounds (pyrazine), aldehydes (acetaldehyde), phenols (vanillin), natural essential oils (lemon oil) and solvent (ethanol). See col. 15, line 41-col. 16, line 24; col. 25, lines 10-11. With regard to the method recited in instant claim 27, since the method simply requires adding to a fragrance composition an effective amount of the aforementioned components, it is the Examiner's position that the method would be inherent in the disclosure of Zampino et al. '057.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 3, 10, 17-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zampino et al. '057.

Zampino et al. '057 differ from the instant claims in that it does not explicitly recite the amount of the components. However, where the general conditions of the claim are

taught by the prior art, it is not inventive to discover the optimum or workable ranges, absent any evidence of superior or unexpected results. It would have been obvious to one of ordinary skill in the art to employ the various components in any amount in order to derive a more beneficial end product.

Double Patenting

8. Claims 10 and 22 are objected to under 37 CFR 1.75 as being a substantial duplicates of claims 3 and 17. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
